Digital NOTAM Workshop

Item 24 - Conclusions

Digital NOTAM Workshop
10 September 2009

"Violent Agreement"

- The current situation cannot continue – Do Nothing is not an option
- Essential building block for SESAR–NetCentric operations - SWIM
- Digital NOTAM will provide safety, efficiency and capacity improvements
- Benefits identified for all stakeholders
- Airspace users (Civil-Military & VFR) fully support
- Initial European implementation roadmap with actions for all stakeholders supported
- Need for global interoperable solutions
- Action plan on the table – to be turned into detailed implementation plan

Impressive progress !

- Digital revolution is now becoming reality in ATM

- Promises of benefits on quality and efficiency are being met

Workshop objectives

- **<u>Roll-out</u>** Event Specification 2.0

- **<u>Collect</u>** feedback from implementations

- **<u>Discuss</u>** any perceived/real issues

Conclusions

- Day 1
  - Looking at specifications
    - Technical, HF, operational
    - Institutional
  - Close partnership ANSP – industry
  - Event Specification 2.0
    - Increment 1 scenarios – mature and stable
    - New scenarios – proposed, require validation

- Day 2
  - Looking at implementations
    - Developments ongoing/maturing
    - Full digital data chain – generation, publication, verification, use
    - Graphical views as the norm
    - Rapid development tools

Next Steps

- **<u>Work will continue</u>**
  - Event Specification 2.0
    - Finalisation, review, formal release
    - Please see the links in the presentation
  - Business rules
  - Related specifications
    - WFS for dynamic features
    - Style (graphical symbols) libraries
    - ePIB

- **<u>Events</u>**
  - OGC Webinar (27 May)
  - SWIM Master class (June – November 2014)
  - Air Transport Information Exchange Conference (25-28 Aug)
