We know what SWIM is !

"The 'horizontal' support ... ss, who ... SOA ..."

SESAR Definition of SWIM:

"SWIM consists of

standards, infrastructure & governance

enabling the management of ATM information

and its exchange between qualified parties

via interoperable services."

Conclusion

- ATM Data/Information/Services more than ever holding the key to the future

- In terms of implementation
  - Unlock the data
  - The XMs are safe investments (but only half the job)
  - Be SOA - Publish / Consume services

- Lets go for a truly global ATM …
